

Emergency Procedure

Any following situation is considered an emergency

1, patient suspected heart attack, stroke, long time fainting

Procedure: keep calm, call 911, and locate the nearest Automated External Defibrillator if possible, apply CPR if needed

2, violent incident

Procedure: keep calm, call 911 if needed, and stay away from the threat

3, fire

Procedure: give direction to meet at designated evacuation location, pull fire alarm if possible, call 911, use fire extinguisher if possible, close doors, remain low if encountering smoke, and use stairs instead of elevator
